Moly Super Alloy Shovels, Spades, Scoops

**MOLY D HANDLE  
STEEL BANDED**

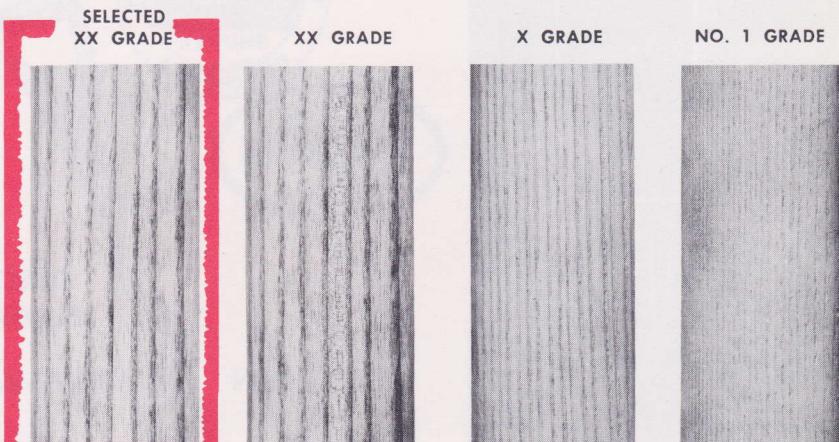

Wood's Moly D Handle is wide and comfortable to the hand. It is stronger than ordinary handles, and won't work loose, split, or check.

# Moly brand

**Tough, Slow-growing Northern White Ash**

Wood's handles are made of clear, straight grain second growth Northern White Ash. The timber is kiln dried in our own plant, with care to prevent case hardening or checking. The handles are graded, and the grade used in this brand is boxed in red below.

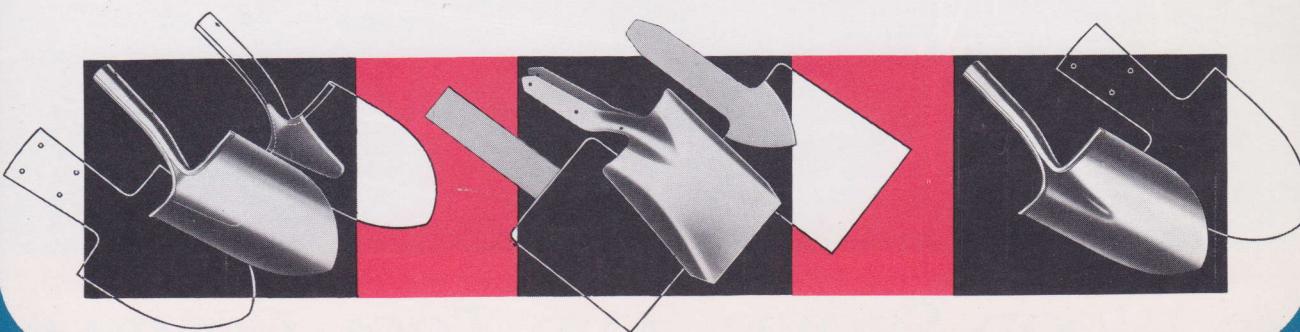

**STEEL I-BEAM HANDLE REINFORCEMENT**

*over 50% stronger than plain handles*

Wood's steel I-Beam insert adds 50% more strength at the point where 65% of all handle breakage occurs. The two-piece reinforcement is riveted solidly through the blade socket, but flanged around the handle above the socket, giving added strength without sacrificing resiliency or spring.

**YOUR CHOICE OF BLADE CONSTRUCTION**

Shovels and spades are manufactured in Closed Back, Plain Back, and Open Back Types. Scoops are furnished in Open Back type only. The Closed Back construction incorporates the best features of all three types:- Smooth back, rolled shoulders, I-beam reinforcement, and straight shoulder chucked handle which makes rehandling easier.

Super Strong • Super Tough

## Mo-lyb-den-um Blades

This Official Mo-lyb-den-um Steel Stamping is placed on the strap or socket of every genuine Moly Shovel, Spade and Scoop.

No other Shovel manufacturer is allowed to use this official emblem which signifies the finest in Shovels, Spades and Scoops.

Mo-lyb-den-um, America's Great Super-Steel, has proved its superior quality in many uses. Mo-lyb-den-um Shovel Blade Steel as pioneered and developed by Wood Shovel Engineers, has proved its outstanding superiority over other blade steels in repeated tests and in hundreds of practical industrial uses. Moly Mo-lyb-den-um Steel, used in all Moly Shovels, Spades and Scoops, is a proven Alloy Shovel Steel with proper Mo-lyb-den-um content, manufactured to Wood's own special analysis and heat treated by Wood's own special process. It is definitely superior to steels of a lower Mo-lyb-den-um content used in conjunction with other alloys. No other Shovels, Spades or Scoops of any brand or make have genuine Moly Mo-lyb-den-um Steel Blades, no others can claim like quality.

### Here's Why They Give You Better Service

#### • HARDNESS . . .

Each Moly blade is Brinell tested and is rejected if this test does not prove a hardness of 460-512. Experience has

proved that "Moly" steel, at this degree of hardness, shows the least abrasive wear and has the longest use-life.

#### • DUCTILITY . . .

Moly Blades have the right ductility and toughness needed to resist strains caused by pry-

ing and twisting. Each Moly Blade is guaranteed against cracking or splitting while in service.

#### • STRENGTH . . .

The Special Analysis Mo-lyb-den-um Blade Steel developed by The Wood Shovel and Tool Company Engineers

and used exclusively in Moly Blades, possesses a tensile strength of 200,000 to 275,000 pounds per square inch.

#### • LIGHTNESS . . .

Moly Blades are lightweight . . . the superior strength of Moly Steel and the proven blade designs justify the use of lighter gauge steel without sacrificing

any strength. Therefore, greater working efficiency results because more material can be handled by the shoveler with less effort.

#### • UNIFORMITY . . .

Moly Blades are heat treated in electrically controlled furnaces and have the same degree of hardness and toughness over the entire Blade. Furthermore, in the many thousands manu-

factured, each blade is identical in quality, design and workmanship. The same quality is furnished in twelve out of every dozen, not a percentage of twelve.

#### • WORKMANSHIP . . .

The reputation of The Wood Shovel and Tool Company as a manufacturer of Shovels, Spades and Scoops has been built by the use of tested and

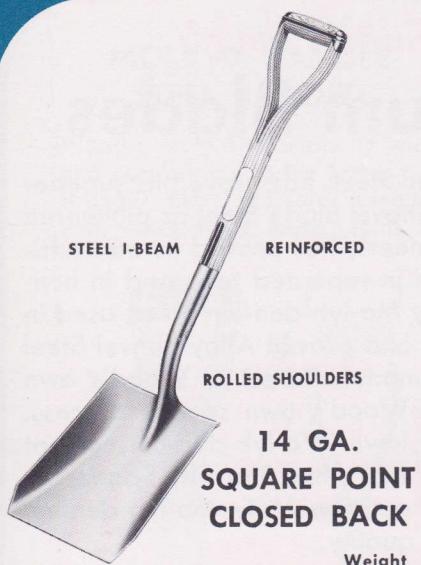

proven materials and by highest standards of workmanship. Each Moly Shovel must be perfect in every particular; each is guaranteed UNCONDITIONALLY.

REG. U.S. PAT. OFF.

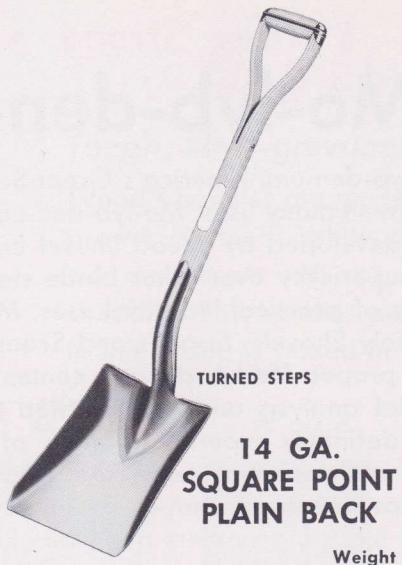

This is the MOLY brand trademark of The Wood Shovel & Tool Company. It is found only on genuine Moly shovels, spades and scoops, manufactured by The Wood Shovel & Tool Company. This trademark is registered in the U. S. Patent Office, and world-wide in all foreign countries, and its use on any other products is specifically forbidden.

Upper: Wheelbarrow trays and legs, ready to bundle and ship to your order.

Lower: Post hole digger stock, ready to ship to your order.

Above: Shovel handles for assembly with the proper blades to your order.

### Wood Carries Stock for prompt shipment.

Wood carries finished stocks of wheelbarrows, post hole diggers, earth augers, etc. Shovel blades and handles are held in stock for fast assembly and shipment to order.

## Here's What It Does For You!

1. Reduces your inventory investment. You make up your requirements of shovels, wheelbarrows, post hole diggers, earth augers, etc., in MIXED CARS.

TRU BLU

2. Increases turnover. You fill in stock throughout the year, in MIXED CARS.

TRU BLU

3. Reduces shorts and back orders. You keep better balanced stocks with more frequent fill-ins from the factory.

TRU BLU

4. Cuts cancellations and increases sales. You pick up business your competitors short or back order; don't lose orders because you can't ship.

TRU BLU

5. YOU MAKE MORE MONEY. You tie up less capital in stock, and you turn it faster.
